More than just a statutory compilation, New York Education Laws is the best way to keep up-to-date with

the broad spectrum of laws impacting education in New York. With commentary on the latest laws by Thomas M. Hamilton, Esq., this volume provides readers with handy summaries of important caselaw, summaries of decisions of the Commissioner of Education, and summaries of new legislation. New York education laws are constantly in flux, and the new edition provides you with an efficient and innovative way to keep abreast of the latest changes. New York Education Laws is a compilation of the entire text of Education Law Titles I-VIII extracted from the New York Consolidated Laws, along with many other related statutes that touch on the administration of education in New York. It includes important topics such as school district organization, taxation and financial administration, special schools and instruction, and state and city colleges and institutions. Now, school principals, administrators, educational organizations, attorneys and state officials will have access to all education laws they need in one volume.

A public school principal's account of the courageous leaders who have dismantled the tracking systems in their schools in order to desegregate classrooms. What would happen if a school eliminated the "tracks" that rank students based on their perceived intellectual abilities? Would low-achieving students fall behind and become frustrated? Would their higher-achieving peers suffer from a "watered-down" curriculum? Or is tracking itself the problem? A growing body of research shows that tracking doesn't increase learning for the minority and low-income students who are overrepresented in low-track classrooms. This de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education. As a principal at a New York high school, Carol Corbett Burris believed that the curriculum for the best students was the best curriculum for all. She helped lead a bold plan to eliminate tracking from her school, and the results couldn't have been further from the doom-and-gloom scenarios of tracking proponents. Instead, there was a dramatic improvement in the achievement of all students, across racial and socioeconomic divisions, and a near elimination of the achievement gap. Today, due to those efforts, International Baccalaureate English is the twelfth-grade curriculum for South Side students, and all students take the same challenging courses, together, to prepare them for college. In *On the Same Track*, Burris draws on her own experience, on the experiences of other schools, and on the latest research to make an impassioned case for detracking. Not only does the practice of tracking fail to benefit lower-tracked students, as Burris shows, but it also results in the resegregation of classrooms. Furthermore, she argues that many of today's popular reforms emanate from the same "sort and select" mentality that reinforces social stratification based on race and class. *On the Same Track* is a rousing, controversial, and yet optimistic account of how we need to change our assumptions and policies if we are to live up to the promise of democratic public education. Only by holding all students to the same high standards can we ensure that all have the same opportunity to live up to their full potential.

Over 300 unusual problems, ranging from easy to difficult, involving equations and inequalities, Diophantine equations, number theory, quadratic equations, logarithms, more. Detailed solutions, as well as brief answers, for all problems are provided.

The intent of this book is to provide a guide for parents to help them navigate the thirteen years of their children's math education (K-12). The book will provide parents with the knowledge and skills they will need to proactively advocate for their children's preparation for the 21st century workforce.
