topics such as greenhouse design and construction, soil preparation, weed control, pests, and summer and winter crops.

This book comprehensively documents the International Harvester Company ' s activities from its inception to its merger with Case as Case IH and their influence in Australia and New Zealand. IHC began with a merger of harvesting machinery companies to for the International Trust, the world ' s biggest farm machinery enterprise at the time. Then IHC became involved with tractors to become the world ' s largest tractor and full-line machinery maker, setting production records that stand to this day.

When Simon and Patricia stumble upon a government scientist testing a weapon of mass destruction, the Saint decides to put a stop to it. But when the Saint s arch-nemesis Rayt Marius turns up, the Saint s plans go astray, leading one of his friends to make the ultimate sacrifice. "

Text and photographs present a history of John Deere tractors.

The first axial flow combine transformed the industry and was hailed as the most significant piece of farm equipment built in the 20th century. The axial flow used advanced technology to process crops faster and more efficiently than anything else on the market. The axial flow started with research done by a rogue Swedish engineer in the 1950s, was continued in secret by a group of dedicated engineers from East Moline, Illinois, who did their work in a top-secret garage that only a select few were allowed to enter. The book tells the story of how extensive research and development allowed IH to build a new machine that took the market by storm. Done with dozens of interviews of engineers, salespeople, and customers, the book captures the behind the scenes drama and the cloak and dagger encounters with rival companies personnel and machines. The dramatic text is accompanied by more than 300 archival images, concept drawings, sketches, and new photography of the machines and men at work today.
