The United States uses and produces many different types and sources of energy, which can be grouped into general categories such as primary and secondary, renewable and nonrenewable, and fossil fuels.

Primary energy sources include fossil fuels (petroleum, natural gas, and

Access Free Energy Its Use And The Environment 5th

coal), nuclear energy, and renewable sources of energy.

U.S. energy facts explained - consumption and production ...

How the United States uses energy.
Americans use a lot of energy in homes, in businesses, and in industry,

Access Free Energy Its Use And The Environment 5th

and to travel and transport goods.

There are four end-use sectors that purchase or produce energy for their own consumption and not for resale:

The residential sector includes homes and apartments.

Use of energy in explained - U.S.
