2011 Updated Reprint. Updated Annually. Global Shipbuilding Industry Handbook. Volume 4. Russia and Eastern Europe

What does luxury value mean? What constitutes luxury, and what does not? While previous research has focused on luxury as a global business and how companies have generated, communicated and monetized luxury, this book draws on empirical research to examine how consumers understand and interact with it. It identifies the components of luxury value, as seen by consumers, and the most influential factors that shape these perceptions. Drawing on a range of disciplinary approaches, the author investigates how consumer segments differ in their perception of luxury products, and how different generations understand value. A comprehensive overview of consumer perceptions of luxury, this book is a must-read for those students and researchers interested in luxury studies.

High Performance Marine Vessels (HPMV) range from the Fast Ferries to the latest high speed Navy Craft, including competition power boats and hydroplanes, hydrofoils, hovercraft, catamarans and other multi-hull craft. High Performance Marine Vessels covers the main concepts of HPMVs and discusses historical background, design features, services that have been successful and not so successful, and some sample data of the range of HPMVs to date. Included is a comparison of all HPMVs craft and the differences between them and descriptions of performance (hydrodynamics and aerodynamics). Readers will find a comprehensive overview of the design, development and building of HPMVs.

Unlike any other Italian manufacturing sector, Italy's recreational boating industry has recorded skyrocketing growth rates for years, ultimately achieving a world leadership position in the construction of motor yachts. But now the global crisis has imposed profound structural changes and significant evolutionary dynamics on the industry's competitive environment. The book aims to answer some of the industry's most hotly-debated issues, including: - What are the key features that led to this success? - What business models characterize Italian shipyards? - Which elements distinguish the Italian industry from its foreign competitors? Which future challenges must the industry overcome in order to maintain its leadership position?
