Well hi ! I've been lucky enough to get my hand on a RTX 3080, Zotac AMP holo. Didn't think first, just took it then, after starting some games to see how well did it do vs my old 1070 SLI, I was surprised to see it easily reaching the 80°C on 4K, doesn't matter that it was CyberPunk or WoW, it was the same damn thing, between 75°C and 82°C.
