Launching Space Objects: Issues of Liability and Future---

All space junk is the result of us launching objects from Earth, and it remains in orbit until it re-enters the atmosphere. Some objects in lower orbits of a few hundred kilometres can return quickly. They often re-enter the atmosphere after a few years and, for the most part, they'll burn up - so they don't reach the ground.

In the recent science fiction film Gravity, the detonation of an old spy satellite by Russia causes a cloud of shrapnel to hurtle towards Sandra Bullock and George Clooney. The 'Kessler Effect' which leads to the collisional cascading of space debris however is not derived from Hollywood fiction. This chain reaction causing increasing amounts of space debris, and in particular untrackable particulate debris, is a risk faced by all satellite operators, the owners of other space objects and...

20 Launching Space Objects Issues Of Liability And Future---

Since 1962, the United Nations has maintained a Register of Objects Launched into Outer Space. Originally established as a mechanism to aid the United Nations Committee on the Peaceful Uses of Outer Space in its discussions on the political, legal and technical issues concerning outer space, the evolution of international space law resulted in space object registration becoming a means of identifying which States' bear international responsibility and liability for space objects.

Launching space objects

1) Each space object has at least one, and often more than one, launching State. 2) Being a launching State means, inter alia, being liable for any damage that the space object may cause on Earth or in space. 3) A State cannot shed its status as a launching State at a later date ("once a launching State, always a launching State").

What is a "Launching State" | The Clean Space blog

The Convention also supplements the 1967 Outer Space Treaty, as well as the 1972 Convention on International Liability for Damage Caused by Space Objects and the 1968 Agreement on the Rescue of Astronauts, the Return of Astronauts and the Return of Objects Launched into Outer Space, both of which address technical and legal issues relating to international cooperation in the use and exploration of outer space exclusively for peaceful purposes.

The 1976 Registration Convention – Space Legal Issues

Further to this, section 1 of article V of the Liability Convention addresses the situation in which multiple launching states are involved. It reads: "1. Whenever two or more States jointly launch a space object, they shall be jointly and severally liable for any damage caused."
