The default setting for the dome drive is 2400 baud. If you are using a Pelco D-type controller, do not reset SW2 switches 1 to 3 or SW2 switches 6 to 8. Pelco P-type controllers can operate at 2400, 4800, and 9600 baud. Set the SW2 switches (6, 7, and 8), located on the base of the dome drive, to the same baud as the Pelco P-type controller.

Dip switch settings for the Spectra IV Dome. - Pelco

Spectra IV DOORASSY. Part number for printed circuit (PC) board with metal plate inside the Spectra Back Box of the Spectra IV dome systems is part number BB4DOORASSY. This door assembly may also be used to replace the Spectra III door assembly of BB53DOORASSY. Below is an explosion diagram of the door assembly.
