The Land Rover has become an icon across the world, famed for its classic design, its practicality and its longevity. In this revised edition of his acclaimed book, first issued as Land Rover - 60 Years of the 4 x 4 Workhouse, James Taylor charts sixty-five years of Land Rover development in comprehensive detail, bringing the story right up to date with the latest Defender variants. Contents include: Prototypes and development vehicles; Standard production models; The special editions; Land Rovers built outside the UK; Special conversions; Military variants; The Land Rovers that never were. The first book to look at the story of the Land Rover's gradual evolution. Comprehensively researched, extensively illustrated and accessibly presented, this will be an indispensable read for all those who have an interest in the legend that is Land Rover. Superbly illustrated with 476 colour photographs. James Taylor's major specialization is the Rover company and its descendants, and he is widely acknowledged as the pre-eminent historian of the Land Rover.

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Australia has some of the world's largest and most labor-efficient farms, and tractors are an essential part of their operations. The average Australian farm has three or more tractors. In this historical overview, the author documents the development of the indigenous tractor industry, from the McDonald Imperial of 1909 to more recent cane, olive, and grape harvesters. Australian Tractors puts the industry in an economic and social history context.

It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

From Adam Steltzner, who led the Entry, Descent, and Landing team in landing the Curiosity rover on the surface of Mars, comes a profound book about breakthrough innovation in the face of the impossible The Jet Propulsion Laboratory (JPL) is home to some of history's most jaw-dropping feats of engineering. When NASA needed to land Curiosity—a 2,000-pound, \$2.5 billion rover—on the surface of Mars, 140 million miles away, they turned to JPL. Steltzner's team couldn't test their kooky solution, the Sky Crane. They were on an unmissable deadline, and the world would be watching when they succeeded—or failed. At the helm of this effort was an unlikely rocket scientist and accidental leader, Adam Steltzner. After barely graduating from high school, he followed his curiosity to the local community college to find out why the stars moved. Soon he discovered an astonishing gift for math and physics. After getting his Ph.D. he ensconced himself within JPL, NASA's decidedly unbureaucratic cousin, where success in a mission is the only metric that matters. The Right Kind of Crazy is a first-person account of innovation that is relevant to anyone working in science, art, or technology. For instance, Steltzner describes: ·How his team learned to switch from fear-based to curiosity-based decision making ·How to escape "The Dark Room"—the creative block caused by fear, uncertainty, and the lack of a clear path forward ·How to tell when we're too in love with our own ideas to be objective about them—and, conversely, when to fight for them ·How to foster mutual respect within teams while still bashing bad ideas The Right Kind of Crazy is a book for anyone who wants to channel their craziness into creativity, balance discord and harmony, and find a signal in a flood of noise.

One of the fastest motor racing circuits in the UK, Thruxton is a supreme test of high speed skill – especially where the art of slipstreaming is concerned. Consequently, it is both feared and revered. This book makes full use of the author's unique collection of many previously unpublished color photos to follow the evolution of UK motorsport at the venue through the 1980s.
