The R-1155 is an English LF and HF super heterodyne receiver covering from 75kHz to 18.5MHz in 5 bands, with D/F (Direction Finding) and homing functions. This receiver started development in 1939 by the Marconi Wireless Telegraph Co and was called the AD.87B/8882B to replace the pre-war T1083 and R1082.

**Army Radio Sales Co. :: R 1155 Lancaster Bomber Radio Receiver**

The R1155 knob, of which I had a spare is not right either because as you can see above those on the T1154 do not have a flat underside. To operate correctly due to protruding end stops the underside needs to be cut back like the T1154 wavechange switch above. As the knob is made from solid material I was able to cut it back by about 5mm to match the shape of the proper knob. It then fitted ...
