After years abroad, Garrison Brown returns home to Vancouver to build a new life. When his beloved grandmother passes away a few weeks before Christmas, Garrison goes to her house to sort out her belongings, including six cats who need new homes. While Garrison hopes to dispense with the task quickly, his grandmother's instructions don't allow for speed. She has left Garrison with some challenging requirements for the future homes of her furry friends--plus a sizeable monetary gift for the new owners. Garrison's job is to match the cats with the right owners without disclosing the surprise gift. Along the way, he may just meet someone who can make him stay. Humorous and heartwarming, this latest Christmas story from bestselling author Melody Carlson is the perfect gift for pet lovers and anyone in whose heart Christmas holds a special place.

Have you tried growing succulents and failed? Are you contemplating on growing these drought-tolerant plants but don't know where to start? Or perhaps you already have a few but can't figure out what is wrong with them? Succulent plants have the reputation of being resilient and easy to grow and maintain, but they can also become delicate and hard to please when treated the same way as non-drought-tolerant plants. The most common reason for failure when growing succulents is giving them too much water. If you search online for succulent care tips, you'll realize there is a lot of opposing advice when it comes to watering succulents. The more you search, the more confusing it gets. Some say they water their succulents twice a week, while others water twice a month. Some soak their plants in water, but some give just a few drops. Some say that misting is not good, while others swear it's how they kept their succulents alive. How will you know which one will work for you? Furthermore, not all the advice you get from others is right for your succulent plants. One method might have worked for others' plants, but that same method might harm yours. Do you know why? Because you might not have the same plant species, and if you do, the plants may not be the same size. You also likely do not have the same soil mixture, and even if you do, containers can vary. Your succulents might be indoors. Theirs might be outdoors, soaking up more sun than yours is inside. And then there's the environment; your humidity levels are probably different, too. A succulent species and its size, soil mixture, container, sunlight exposure, and humidity levels matter. All these factors can affect the amount of water your succulents need—and how often they need it. To be successful in growing succulents, you must understand how water plays an essential role in their existence, and base your care on the location where you are growing them. In this book, you'll learn about the uniqueness of

succulents and the unusual way they handle water

She's on the run. He has a Viking vendetta. When they unite through history, will they find doom or destiny? Boston, 2019. Mia is desperate to protect her unborn child. Arias Cuevas sets in motion a chain of bloody events when police catch him trying to carry a shipment of la Tía's cocaine into Italy. The intended recipient of the coke appears to have been art smuggler Nazzareno Corradi. But Corradi has been set up and through his lawyer hires "the Alligator" to get him out of the mess he's in. Meanwhile, la Tía, a notoriously ruthless figure in the Colombian drug trade, is determined to move her operation to Italy, where

cocaine has become all the rage among the professional classes. There's only one thing standing in her way: the Alligator. The Alligator, an ex-con turned investigator, and his two companions, former underworld heavy, Beniamino Rossini, and Max the Memory, a once militant political activist in whom a certain idealism has not faded, are among Massimo Carlotto's most vivid noir creations. They readily demonstrate why Carlotto has been called "the reigning king of Mediterranean noir."

A textbook that approaches modern macroeconomics through its microeconomic foundations, with an emphasis on financial market connections and policy applications. The modern study and analysis of macroeconomics begins by considering how microeconomic units—consumers and firms—make decisions, and then investigates how these choices interact to yield economy-wide outcomes. This innovative textbook takes this “modern” approach, teaching macroeconomics through its microeconomic foundations. It does so by adopting the representative agent paradigm. By modeling the representative consumer and the representative firm, students will learn to describe macroeconomic outcomes and consider the effects of macroeconomic policies. Unique in its coverage of monopolistic competition, financial markets, and the interaction of fiscal and monetary policy, Modern Macroeconomics is suitable for use in intermediate undergraduate, advanced undergraduate, and graduate level courses. The book first introduces the building blocks of macroeconomics, the heart of which is the representative consumer. It goes on to offer a brief history of macroeconomic thought, including supply-side economics, the Phillips curve, and the New Keynesian framework. It then covers two policy applications, monetary policy and the interaction of monetary and fiscal

policy; optimal policy analysis for both the flexible price and the rigid price case; long-run steady states, treating the Solow growth framework and the neoclassical growth model; a search-and-matching framework for the analysis of unemployment; and the application of the tools of modern macroeconomics to “open economy,” or international macroeconomics. End-of-chapter problem sets enable students to apply the concepts they have learned. A separate Solutions Manual will be available for students to purchase. Teaching materials, including complete solutions and slides, will be available to qualified instructors.

When cybercriminals hack into the US Marshals' Witness Protection database and auction off witnesses' personal details to the highest bidders, the RED Team led by FBI Agent Sean Nichols begins a high-stakes chase to find the hacker. But before he can even get started, the first witness is targeted and barely escapes with her life. Sean believes Phantom, an obsessed hacker who previously outwitted the top minds in the field, is behind the attack, and Sean needs this witness's help, as she's the person who has come closest to discovering Phantom's identity. Trouble is, she's a witness under the care of US Marshal Taylor Mills, and Sean is reluctant to work with the captivating marshal who knows his deepest secrets. But Phantom claims he knows where the witness is hiding and will kill her, so to stop the hacker, Sean and Taylor must work through their personal pain and learn to trust each other. . . .
