This book is based on, and expanded from, a course on technical report writing that the author has presented for over 20 years. Are you an engineer who writes technical reports as part of your job, yet you wish you could make them shorter and better - and write them faster? Maybe you write external reports for your consultancy's clients, or internal reports for senior managers. Maybe sometimes you think you signed up to be an engineer not a writer. But now you are a writer as well as an engineer and you wish that writing a good report was easier. This book will show you how to write shorter and better reports, and write them faster. The author is a retired chartered engineer and who has written about 100 articles and four books - published by Kogan Page, Macmillan and San Francisco Press. Here is just one comment from one client who arranged for the course on which this book is based to be presented to his staff: "Thank you for the course. All the feedback I've had so far has been very positive... which is quite unusual as they can be a cynical bunch." Well, not so much as cynical as don't like "silly-fairy" ideas. The book is down-to-earth with practical ideas.You will learn - How to break the task into three phases: planning, writing and editing.- How to avoid the biggest complaint about technical reports. - How to use three layers of sequencing to make the writing easier.- The most common format for technical reports - and three others. - How much detail to include.- Twelve big tips to improve the writing and several smaller tips.- How to satisfy both technical and non-technical readers.- How to cut the waffle.- How to edit your own work, which is never an easy thing to do.- Seventeen consistency checks to look for when editing.- How to get the best from the Microsoft grammar checker.- How to use the readability statistics.- Variations between British and US English.PLUS: A style guide with over 130 items of guidance, including all the punctuation marks. Did you know that the hyphen has been described as the punctuation mark to drive you mad?

Technical Reports are usually written according to general standards, corporate - sign standards of the current university or company, logical rules and practical - periences. These rules are not known well enough among engineers. There are many books that give general advice in writing. This book is specialised in how to write Technical Reports and addresses not only engineers, but also natural sci- th tists, computer scientists, etc. It is based on the 6 edition published in 2008 by st Vieweg in German and is now published as 1 edition by Springer in English. Both authors of the German edition have long experience in educating en- neers at the University of Applied Sciences Hannover. They have held many l- tures where students had to write reports and took notes about all positive and negative examples that occurred in design reports, lab work reports, and in theses. Prof. Dr. Lutz Hering has worked for VOLKSWAGEN and DAIMLER and then changed to the University of Applied Sciences Hannover where he worked from 1974 until 2000. He held lectures on Technical Drawing, Construction and Design, CAD and Materials Science. Dr. Heike Hering worked nine years as a Technical Writer and was responsible for many CAD manuals in German and English. She is now employed at TÜV NORD Akademie, where she is responsible for E-Learning projects, technical documentation and software training and supervises students who are writing their theses. Prof. Dr.-Ing.

The bestselling guide to reporting writing, updated and reworked for today's practice Essentials of Assessment Report Writing offers effective solutions to the creation of reader-friendly, yet targeted, psychological, and educational assessment reports. Parents, clinicians, clients, and other readers need more than test-by-test descriptions—they need an accessible analysis of the entire situation to determine their next steps. This book provides clear guidance for busy practitioners seeking ways to improve their report writing skills. With a focus on current practice, this new second edition covers DSM-5 updates and the latest assessment instruments including the WJ IV, WISC-V, WAIS-IV, KTEA-3, and the CAS2. New discussion includes advice on tailoring the report to the audience, and annotated case reports provide illustrative models of effective report styles, interpretation, and analysis. Key concepts are highlighted for quick reference throughout, and end-of-chapter questions help reinforce understanding. Reporting styles vary widely within the field, in both content and style; there is no definitive "standard," but many reports fail to reflect best practices and therefore prove less than useful to the reader. This book provides expert guidance throughout the reporting process to help practitioners provide high-quality, accessible reports. Integrate assessment results to provide a person-centered report Identify and navigate critical decision points in the interpretive process Write efficiently yet effectively while enhancing the reader's experience Provide an accurate, informative, and readable assessment report Incorporate practical recommendations to address the referral concerns Expertly-conducted assessments should culminate with a carefully constructed analysis that provides direction via clear communication. Because this report will be used to inform treatment, intervention, and ultimately, the client's quality of life—it is critical that it provides clear, informative guidance in a way that readers can understand. Essentials of Assessment Report Writing provides comprehensive guidelines for navigating through the report writing process.
