The global cigarette: origins and evolution of British ...

The history of smoking dates back to as early as 5000 BC in the Americas in shamanistic rituals. With the arrival of the Europeans in the 16th century, the consumption, cultivation, and trading of tobacco quickly spread. The modernization of farming equipment and manufacturing increased the availability of cigarettes following the reconstruction era in the United States. Mass production quickly expanded the scope of consumption, which grew until the scientific controversies of the 1960s, and con

History of smoking - Wikipedia

By 1830, the cigarette had crossed into France, where it received the name cigarette; and in 1845, the French state tobacco monopoly began manufacturing them. The French word was adopted by English in the 1840s. Some American reformers promoted the spelling cigaret, but this was never widespread and is now largely abandoned.

Cigarette - Wikipedia

The epidemic of teen vaping [1–3] and the outbreak of vaping-related lung injuries and deaths in the U.S. [4] underscore the urgent need to systematically regulate electronic cigarette manufacturing, marketing, and distribution. However, development of plausible and effective vaping regulations and most importantly, their enforcement are likely to present unique challenges to countries ...

The cigarette is the deadliest artifact in the history of human civilization. It is also one of the most beguiling, thanks to more than a century of manipulation at the hands of tobacco industry chemists. In Golden Holocaust, Robert N. Proctor draws on reams of formerly-secret industry documents to explore how the cigarette came to be the most widely-used drug on the planet, with six trillion sticks sold per year.
