The heart sends blood around your body. The blood provides your body with the oxygen and nutrients it needs. It also carries away waste. Your heart is sort of like a pump, or two pumps in one. The right side of your heart receives blood from the body and pumps it to the lungs.

*Your Heart & Circulatory System (for Kids) - Nemours ...*

Your heart is roughly the size of a fist and sits in the middle of your chest, slightly to the left. It's the muscle at the centre of your circulation system, pumping blood around your body as your heart beats. This blood sends oxygen and nutrients to all parts of your body, and carries away unwanted carbon dioxide and waste products.

*How your heart works | NHS inform*

The heart is a muscular organ in most animals, which pumps blood through the blood vessels of the circulatory system. The pumped blood carries oxygen and nutrients to the body, while carrying metabolic waste such as carbon dioxide to the lungs.

*Heart's £10k All Day: Our final day comes to an end - Heart*

So when we read about the heart in the Bible, it is about the place where you have your will, your attitude and intentions, and which is the source of your thoughts, actions and words. This heart is the core of who you are as a person. Your heart is, essentially, you. With your heart you choose between good and evil.

*What does it say about the heart in the Bible?*

Your heart is made up of three layers of tissue: Pericardium – a thin

All Our Health is a series of resources for health and care professionals working with patients and the population. Aimed at preventing illness, protecting health and promoting wellbeing.

*All Our Health: about the framework - GOV.UK*

The heart is like a big pump made of muscles, and it constantly pumps blood throughout our bodies every minute of every day. These movements are called 'involuntary' which means you don't actually have to think about making your heart beat; your brain does the work for you and passes on the message.

*The Heart For Kids | Cool Kid Facts*

The heart is the organ that helps supply blood and oxygen to all parts of the body. It is divided by a partition (or septum) into two halves. The halves are, in turn, divided into four chambers. The heart is situated within the chest cavity and surrounded by a fluid-filled sac called the pericardium.

*The Anatomy of the Heart, Its Structures, and Functions*

with all my heart With all the energy and enthusiasm I can muster. This phrase has been around since the sixteenth century, and was so well known by the time Jonathan Swift assembled Polite Conversation (1738) that he wrote, "With all my heart and a piece of my liver."
