racist gang. Twenty years later, L Troop's top boys - models of vice, deviance and violence - are far beyond justice. There are some people the law will not touch. But Eldine's murder is not forgotten. His story is once again on everyone's lips and the streets of south London; a story of police corruption and the elimination of witnesses. A solicitor, a rent boy, a one-eyed comedian and his minder are raising ghosts; and Carl Hyatt, disgraced reporter, thinks he knows why. There's one man linking this crew of rambunctious dandies and enchanting thugs, and it's the man Carl promised never to challenge again: Mulhall, kingpin of London's rotten heart and defender of L Troop's racist killers. Carl must face up to the morality of

retribution and the reality of violence knowing that he is the weak link in the chain; and that he has placed everyone he loves within Mulhall's reach. The Treatment is steeped in London's criminal past, its shadows of corruption and institutional racism. Like a seventeenth-century revenge tragedy, its characters reel from the streets, bars and brothels, hyperarticulate and propelled by wild justice.

With health reform enacted by the Congress and signed by the President, the subject matter of *The Treatment Trap* is a compelling component in the national debate. Taking advantage of Rosemary Gibson's knowledge gleaned from extended experience in the field of medical care and Janardan Singh's similar knowledge but from a financial perspective, the authors explore the most neglected issue in American medicine today: the overuse of medical care, including needless surgery and other invasive procedures, out-of-control x-ray imaging, profligate testing, and other wasteful

Their combined reporting and analysis concentrates on the human aspects of this disturbing trend in health care, with personal experiences that reflect poorly on hospitals as well as physicians. They show how money spent for questionable and even useless care is diverting major funds that could be better used to treat patients who are genuinely sick and sometimes cannot afford the extravagant charges of the American health-care system. Their suggestions for reforming the delivery of health care, and their cautions to individual consumers about how to deal with situations they may encounter, make The Treatment Trap

The account begins with the efforts of the Treatment Action Campaign (TAC) to rouse public alarm over the puzzling intransigence of the government and the lack of drugs for people suffering from untreated AIDS.
