"Vasectomy, Fresh Flounder and God?" is an anthology of sixty-one essays, several short stories and poems, one very short one act play and a few other things. As the title suggests, the subject matter varies from vasectomy to God. The book is funny, serious, thoughtful, bold and occasionally sad, but never dull. You will laugh at the story of Sarazin's "Vasectomy" and the "Missed

Opportunity" with his heartthrob when he was twelve. "The Race", the story of a bazaar ocean sailboat race, may leave you shaking your head. The stories of "Gabe and Rose" and "Hank" will tug at your heart. Sarazin's views on "God?", morals and "Same Sex Marriage" may spark conversation, but there is no question of their clarity. This book is a journey through the eclectic mind of Harry Sarazin who writes what he thinks, always honestly and never shyly.

American corporate philanthropies launched a national campaign of ethnic cleansing in the United States, helped found and fund the Nazi eugenics of Hitler and Mengele -- and then created the modern movement of "human genetics." Some 60,000 Americans were sterilized under laws in 27 states. This expanded edition includes two new essays on state genocide.

"The author's agenda in writing the book was to provoke critical thinking and awareness and to move beyond the simplistic rhetoric that so often characterizes much of public debate on health care matters. I have no doubt that he has achieved these aims...and more."

Sociology Volume 43, Number 3, June 2009 "Sociology & Health Care is easy to read and offers an introduction into selected, but key areas, of the sociology of health and illness. It is a useful book for health care students as well as health care workers who are interested in the social aspects of their work, their job and how it all fits into the wider society." Sociological Research Online Are patients 'customers'? What does this mean for the patient-practitioner relationship? What should the relationship be between expert knowledge and our own experiences when dealing with health and illness? Do people who are better off get better access to health care? Debates about the future of health care bring questions about patient choice, paternalism and inequalities to the fore. This book addresses some of the sociological issues surrounding these questions including: The social distribution of knowledge The basis

of professional power Sources of social inequalities in health The ability of health care services to address these issues The book provides suggestions and examples of how sociological concepts and insights can be used to help think about important contemporary issues in health care. For that reason, it has a practical as well as academic purpose, contributing to improvement of the quality of interaction between patients and practitioners. The core themes running throughout the book are inequalities in health and the rise of chronic disease, with particular attention being given to psycho-social models of illness which locate individual experiences within wider social relationships. Sociology and Health Care is key reading for student nurses and those on allied health courses, and also appeals to a wide range of professionals who are interested in current debates in health and social care.

The guide to engaging and directing the three primordial forces of Earth, Heaven, and Higher Self to achieve enlightenment and immortality • Explains how to circulate the life force, or chi, by balancing yang (male) and yin (female) currents of bioenergy • Includes an overview of the complete Taoist body/mind/spirit system along with newly refined methods of activating the life force • The sequel to the classic Awaken Healing Energy Through the Tao In 1983, Mantak Chia introduced the “Microcosmic Orbit” to the West. Prior to that time, most of the Eastern energy practices transmitted to the West were incomplete, dealing only with the ascending yang/masculine channel, which shoots life-force energy up the spine. The Microcosmic Orbit showed practitioners how to establish the descending yin/feminine channel of the life-force

energy loop. Within Taoist systems, cultivating feminine energy has always been seen as the key to gaining balance and wholeness. Healing Light of the Tao presents the more advanced methods of chi cultivation in the Microcosmic Orbit, offering a full understanding of Taoist spiritual theory through its comprehensive overview of the complete Taoist body/mind/spirit system. The book also includes more advanced meditation methods for absorbing the higher frequencies of Earth Force, Cosmic Force, and Universal Force (Heavenly chi) into the basic orbit. It establishes a spiritual science that not only emphasizes practical benefits to health, sexual vitality, and emotional balance, but also shows how changes made in the energy body can lead to physical rejuvenation that the Taoists called immortality.

"A good organizer is a social arsonist who goes around setting people on fire."—Fred Ross Raised by conservative parents who hoped he would "stay with his own kind," Fred Ross instead became one of the most influential community organizers in American history. His activism began alongside Dust Bowl migrants, where he managed the same labor camp that inspired John Steinbeck's *The Grapes of Wrath*. During World War II, Ross worked for the release of interned Japanese Americans, and after the war, he dedicated his life to building the political power of Latinos across California. Labor organizing in this country was forever changed when Ross knocked on the door of a young Cesar Chavez and encouraged him to become an organizer. Until now there has been no biography of Fred Ross, a man who believed a good organizer was supposed to fade into the crowd as others

stepped forward. In America's Social Arsonist, Gabriel Thompson provides a full picture of this complicated and driven man, recovering a forgotten chapter of American history and providing vital lessons for organizers today.

This concise, easy-to-read book tackles the potentially awkward subject of culture in a direct, non-intimidating style. It prepares all health professionals in any clinical setting to conduct thorough assessments of individual from culturally specific population groups, making it especially valuable in today's team-oriented healthcare environment. The book is suitable for healthcare workers in all fields, particularly nurses who interact with the patients 24 hours a day, every day of the week. Based on the Purnell Model for Cultural Competence, it explores 26 different cultures and the issues

that healthcare professionals need to be sensitive to. For each group, the book includes an overview of heritage, communication styles, family roles and organization, workforce issues, biocultural ecology, high-risk health behaviors, nutrition, pregnancy and child bearing, death rituals, spirituality, healthcare practices, and the views of healthcare providers. It also discusses the variant characteristics of culture that determine the diversity of values, beliefs, and practices in an individual's cultural heritage in order to help prevent stereotyping. These characteristics include age, generation, nationality, race, color, gender, religion, educational status, socioeconomic status, occupation, military status, political beliefs, urban versus rural residence, enclave identity, marital status, parental status, physical characteristics, sexual orientation, gender issues, health literacy, and reasons for migration. Each chapter

offers specific instructions, guidelines, tips, intervention strategies, and approaches specific to a particular cultural population.

New York magazine's "Science of Us" editor explains the compelling psychology of awkwardness, and asks: what if the moments that make us feel most awkward are actually valuable? Have you ever said goodbye to someone, only to discover that you're both walking in the same direction? Or had your next thought fly out of your brain in the middle of a presentation? Or accidentally liked an old photo on someone's Instagram or Facebook, thus revealing yourself to be a creepy social media stalker? Melissa Dahl, editor of New York magazine's "Science of Us" website, has. After a lifetime of cringing, she became intrigued by awkwardness: a universal but underappreciated emotion. In this witty and

compassionate book, Dahl explores the oddest, cringiest corners of our world. She chats with strangers on the busy New York City subway, goes on awkward friend dates using a "Tinder-for-friendship" app, takes improv comedy lessons, and even reads aloud from her (highly embarrassing!) middle school diary to a crowd of strangers. After all of that, she realizes: Awkward moments are opportunities to test yourself. When everyone else is pretending to have it under control, you can be a little braver and grow a little bigger--while remaining true to your awkward self. And along the way, you might find that awkward moments unite us in our mutual human ridiculousness.
